### **TIPS**

Use mineral spirits (a little goes a long way), to remove adhesives, and other hard to remove window gunk.

### **TRICKS**

Use vinegar for your window cleaning. Vinegar doesn't streak and is great at cutting grease. Use a 50/50 mix, with distilled water.

## Window Cleaning Doesn't Have to be a Pain in The Glass!

What you will need for interior and exterior window washing

- Micro-fiber window washer & squeegee
- Extension pole, or broom handle
- Bucket for liquid Cleaner
- Window Cleaning Solution
- Bug-spray (just in case)
- Step-stool
- Safety gloves and glasses
- Microfiber drying towels
- Old toothbrush
- Razor Blade (use with caution)

Amazon has great window tools

### 1. Begin with the frames and tracks of windows

If necessary, spray any insect nests with repellent first, Open the window, and clean the inside tracks. Use a toothbrush to scrub out the dirt buildup. A Vacuum cleaner is great for the tracks/runners, for any dirt remaining.

### 2. Clean the window panes.

Generously spray the window panes, (or dip the window-washer into the solution, and shake it off). With either method, you want to scrub the windows both up and down, and side to side. The window will still be very wet. Use the squeegee to direct all liquid down. Towel off the end of the squeegee to prevent a streak of liquid on the previously cleared area. Finally, use a microfiber towel to dry all corners and sides where the window meets the frame. Give a final "wipe-down" of window tracks.

**✂ TIP: Use a razor blade to remove tough paint spots. Turn the razor down, and angle it so it slides across the glass, no scratching.**

### 3. Exterior Window Cleaning

Repeat above for exterior windows. They will require more time. Have someone hold a ladder if necessary. Use an extension pole for high windows. Use safety accessories, common sense, and revel at the marvelous window washing job you've done.

**✂ TIP: We agree with a 2/1 window cleaning routine. The interior windows twice per year, and the outside windows once per year, at spring cleaning time.**

## Why Hire a Professional Window Cleaning Company in Orlando?

1. Its safe. No spiders and bees to deal with (or shaky ladders).
2. Guaranteed Flawless Window Cleaning Results
3. Increase the Appeal of Your Home or Business Store-Front.
